

REPUBLIC OF CROATIA
CROATIAN BUREAU OF STATISTICS

PRESS RELEASE

**NEW: INTERACTIVE CALENDAR OF STATISTICAL DATA ISSUES
OF THE CROATIAN BUREAU OF STATISTICS**

The Croatian Bureau of Statistics continues to work on upgrading its web site, which is the main channel for disseminating statistical data and which is increasingly developing into the main interactive tool used by users to access information.

In order to respond to users' needs according to the results of the recent User Satisfaction Survey, we have introduced new features to our web site, and we invite you to explore them.

The improvements we prepared in the form of a new appearance of issued data through the interactive Calendar of Statistical Data Issues as well as of browsing through First Releases and Statistical Reports are the first stage of the modernisation of our web site, which we carried out using our own resources.

Further steps will include the modernisation of publicly accessible data bases and the increased number of time series that can be reached in such a way. A more significant redesign of our web site, which is planned to be done in the advanced stage, will further facilitate the navigation and improve the site's layout, and thus the Croatian Bureau of Statistics will follow the trends in designing the web site.

Further on, in our wish to adapt to new trends and changes, we decided to intensively use the potentials of social networks such as Facebook, Twitter and LinkedIn where you can reach us, as well as of the RSS service.

Since we would like to have a feedback about your experiences, we invite you to offer, in the [Feedback Questionnaire](#) and/or through social networks, your suggestions for creating our new web site, which exists, along with statistics, only to respond to the needs of you, our users.

Adopting your suggestions for the improvement of our services, we intend to continue to extend our offer in the next interval with even more new features adjusted to the requirements of the contemporary market.

You can find more information at the official web site of the Croatian Bureau of Statistics at www.dzs.hr.
