PRESS RELEASE

ON PUBLICATION
OF QUARTERLY GROSS DOMESTIC PRODUCT FLASH ESTIMATE
For Fourth Quarter of 2010.

The Central Bureau of Statistics publishes the flash estimate of the quarterly gross domestic product for the fourth quarter of 2010. It is a result of the effort of the Central Bureau of Statistics to shorten the period between the collection and publication of statistical data by further harmonisation with EU publishing standards as stipulated by one of the main principles of official statistics, namely the timeliness.

Flash estimate shows that the quarterly gross domestic product decreased in real terms by 0,7% in the fourth quarter of 2010, as compared to the same quarter of 2009.

Flash estimate shows that the gross domestic product decreased in real terms by 1,4% in 2010, compared to 2009.

By making the flash estimate of the quarterly gross domestic product available to the users, better quality decision making in economic, demographic and social areas will be enabled.

The flash estimate of the real growth rate of the quarterly GDP can differ from the data from the standard First Release titled "Quarterly Gross Domestic Product Estimate for the Fourth Quarter of 2010" that will be published on 31 March 2011 in printed form and on the CBS's website (www.dzs.hr).

This procedure of publishing quarterly GDP data will be applied to the following quarter as well.

Zagreb, 25 February 2011
