

REPUBLIC OF CROATIA

CROATIAN BUREAU OF STATISTICS

**QUALITY REPORT FOR STATISTICAL SURVEY**  
**Spatial Statistical Register of the Croatian Bureau of Statistics**  
**for 2019**

Organisation unit: Geoinformation System Development Unit  
Prepared by: Branko Crkvenčić and Petar Fijačko

July 2021

## 0. Basic information

- Purpose, goal, and subject of the survey

The Spatial Statistical Register (hereinafter: PSR) is a register containing data on spatial units for level 1, level 2 and level 3 of the National Classification of Spatial Units for Statistics, counties, cities/municipalities, local government units, settlements, statistical circles, enumeration areas, streets/squares, house numbers, households and other.

The above-mentioned data are registered in the PSR in alphanumeric and graphic format. PSR is the basis for statistical registers and statistical activities that use spatial units data.

- Reference period

Calendar year

- Legal acts and other agreements

Official Statistics Act (OG, Nos 103/03, 75/09, 59/12 and 12/13 – consolidated text)

National Land Surveying and Real Estate Cadastre Act (OG, Nos 16/07, 124/10 and 112/18)

Ordinance on Register of Spatial Units (OG, No. 37/08)

Ordinance on Statistical Registers (OG, No. 59/14)

- Classification system

Common classification of territorial units for statistics (NUTS)

- Concepts and definitions

Contains data on country, statistical region, county, city and municipality, settlement, local self-government unit, statistical circle, enumeration area, squares and buildings with associated house numbers

- Statistical units

Spatial units up to the house number level

- Statistical population

All types of spatial units

## 1. Relevance

### 1.1. Data users

Internal users:

- Social Statistics Sector
- Business Statistics Sector
- National Accounts Sector

External users:

- State Geodetic Administration
- Ministry of Foreign and European Affairs

#### 1.1.1. User needs

Users are interested in historical background of spatial units.

#### 1.1.2. User satisfaction

The Census 2011 determined the quality of delivered data on spatial units.

### 1.2. **Completeness**

The database on spatial units is complete.

#### 1.2.1. Data completeness rate

Data completeness rate is 100%.

## 2. **Accuracy and reliability**

### 2.1. **Sampling error**

The calculation of sampling error is not applicable.

#### 2.1.1. Sampling error indicators

Indicator for this survey is not applicable.

#### 2.1.2. Bias due to sample selection process

Indicator for this survey is not applicable.

### 2.2. **Non-sampling error**

The calculation of non-sampling error is not applicable.

#### 2.2.1. Coverage error

The calculation of coverage error is not applicable.

#### 2.2.2. Over-coverage rate

Indicator for this survey is not applicable.

#### 2.2.3. Measurement errors

The calculation of measurement error is not applicable.

#### 2.2.4. Non-response errors

The calculation of non-response error is not applicable.

#### 2.2.5. Unit non-response rate

Indicator for this survey is not applicable.

#### 2.2.6. Item non-response-rate

Indicator for this survey is not applicable.

#### 2.2.7. Processing errors

The calculation of processing error is not applicable.

#### 2.2.8. Imputation rate

Indicator for this survey is not applicable.

#### 2.2.9. Editing rate

Indicator for this survey is not applicable.

#### 2.2.10. Hit rate

Indicator for this survey is not applicable.

#### 2.2.11. Model assumption error

Model selection error is not applicable

### **2.3. Data revision**

#### 2.3.1. Data revision – policy

The users of statistical data are informed about revisions (preliminary, final data) on the web site of the Croatian Bureau of Statistics.

#### 2.3.2. Data revision – practice

Provisional figures are not published in this survey and therefore regular revisions are not planned.

#### 2.3.3. Data revision – average size

Indicator for this survey is not applicable.

### **2.4. Seasonal adjustment**

Seasonal adjustment is not applicable in relation to spatial component.

## **3. Timeliness and Punctuality**

### **3.1. Timeliness**

#### 3.1.1. Timeliness – first results

Indicator for this survey is not applicable.

3.1.2. Timeliness – final results

Indicator for this survey is not applicable.

**3.2. Punctuality**

3.2.1. Punctuality – delivery and publication

Indicator for this survey is not applicable.

**4. Accessibility and clarity**

Not applicable.

**4.1. News release**

Spatial data make a constituent part of certain statistical data.

**4.2. Other publications**

Statistical Yearbook of the Republic of Croatia

**4.3. On-line database**

Not applicable.

**4.4. Micro-data access**

The conditions under which certain users can access microdata are regulated by the Ordinance on the Conditions and Terms of Using Confidential Data for Scientific Purposes.

**4.5. Documentation on methodology**

The Model for the Differentiation of Urban, Rural and Semi-Urban Settlements in the Republic of Croatia, Methodological Guidelines 67/2011

Directory of Settlements – Systematic (internal publication), Zagreb, 2011

Directory of Settlements – Alphabetical (internal publication), Zagreb, 2011

**5. Comparability**

**5.1. Asymmetry for mirror flows statistics**

If statistical data contain a spatial component, this check can also be done.

**5.2. Comparability over time**

5.2.1. Length of comparable time series

Indicator for this survey is not applicable.

5.2.2. Reasons for break in time series

Not applicable.

## **6. Coherence**

### **6.1. Coherence – short-term and structural data**

Indicator for this survey is not applicable.

### **6.2. Coherence – national accounts**

Indicator for this survey is not applicable.

### **6.3. Coherence – administrative sources**

Indicator for this survey is not applicable.

## **7. Cost and burden**

### **7.1. Cost**

Not applicable.

### **7.2. Burden**

Not applicable.
