1) Za uvoz i izvoz električne energije primjenjuje se nova Eurostatova definicija koja uključuje i tranzit. Količine električne energije smatraju se uvezenima ili izvezenima kada prijeđu političke granice zemlje bez obzira na to jesu li ocarinjene ili ne. Ako električna energija prolazi kroz zemlju, količina te energije prijavljuje se i kao uvoz i kao izvoz.

1) For the import and export of electricity, a new Eurostat definition is used, which includes transit: amounts of electricity are considered imported or exported when they have crossed the political boundaries of a country, regardless of whether customs clearance has taken place or not. If electricity transits through a country, the amount should be reported as both import and export.
