PREDGOVOR

Popis stanovništva, kućanstava i stanova 31. ožujka 2011. proveden je na temelju Zakona o Popisu stanovništva, kućanstava i stanova u Republici Hrvatskoj 2011. godine (NN, br. 92/10.) te u skladu s relevantnim međunarodnim statističkim standardima.

Nakon osamostaljenja Republike Hrvatske, Popis stanovništva, kućanstava i stanova 2011. bio je drugi koji je proveden u samostalnoj državi, a ujedno i drugi koji se samostalno pripremao u organizaciji Državnog zavoda za statistiku.

Dok se Popisom stanovništva, kućanstava i stanova 2001. željelo utvrditi broj osoba s invaliditetom, u Popisu 2011. utvrdio se broj osoba s teškoćama u obavljanju svakodnevnih aktivnosti.

Sadržaj podataka o osobama s teškoćama na Popisnici definiran je u skladu s Preporukama Konferencije europskih statističara za popise stanovništva i stanova 2010. Pitanja identificiraju osobe s teškoćama koje mogu ograničavati njihovu samostalnost u svakodnevnom životu.

Ova publikacija sadržava podatke o osobama s teškoćama prema starosti i spolu, uzrocima i vrsti teškoća, fizičkoj pokretljivosti i obrazovnoj strukturi. Namjena ovih podataka jest usporedba razine sudjelovanja u zaposlenosti, obrazovanju ili obiteljskom životu osoba s teškoćama i osoba bez teškoća kako bi se vidjelo jesu li osobe s teškoćama ostvarile socijalnu uključenost.

Radi boljeg razumijevanja popisnih podataka u ovoj publikaciji upućujemo korisnike na Metodološka objašnjenja u nastavku gdje su dana detaljna objašnjenja pojedinih pojmova, definicija i postupaka te na Metodološke upute za Popis stanovništva, kućanstava i stanova 31. ožujka 2011.

FOREWORD

The 2011 Census of Population, Households and Dwellings of 31 March 2011 was carried out pursuant to the Act on the Census of Population, Households and Dwellings in the Republic of Croatia in 2011 (NN, No. 92/10) and in line with relevant international statistical standards.

After the Republic of Croatia became independent, the 2011 Census of Population, Households and Dwellings was the second census carried out in independent Croatia, and the second one that the Croatian Bureau of Statistics organised on its own.

One of the objectives of the 2001 Census of Population, Households and Dwellings was to determine the number of disabled people, while in the 2011 Census determined the number of persons with difficulties in performing activities of daily living.

Contents of data on persons with difficulties are defined in the Questionnaire in line with the Conference of European Statisticians Recommendations for the 2010 Censuses of Population and Housing. Questions identify population with difficulties that may limit their self-reliance in everyday life.

This publication contains data on persons with difficulties by age and sex, causes of difficulties, type of difficulties, physical mobility and education structure. These data are meant for the comparison of the level of participation in employment, education or family life of persons with difficulties and persons without difficulties in order to find out if persons with difficulties achieved social inclusion or not.

For a better understanding of census data in this publication, users are kindly referred to the Notes on Methodology given below, which contain detailed explanations of individual concepts, definitions and procedures, as well as to the Notes on Methodology for the Census of Population, Households and Dwellings of 31 March 2011.

METODOLOŠKA OBJAŠNJENJA

Uvod

Na početku može se postaviti pitanje o korištenju, odnosno potrebi podataka o osobama s teškoćama. Odgovor na to pitanje treba biti spoznaja o broju osoba s teškoćama, njihovoj dobnoj i spolnoj strukturi i prostornoj rasprostranjenosti kako bi se moglo pristupiti rješavanju njihovih problema i potreba.

Publikacija daje podatke o udjelu osoba s teškoćama u odnosu na one koje to nisu te njihovu dobnu i spolnu strukturu kako bi pomogla relevantnim osobama u donošenju adekvatnih odluka i mjera.

Na temelju općih podataka o osobama s teškoćama, broju i njihovoj strukturi moguće je planirati određene programe u cilju osiguravanja usluga uključujući razvoj programa i politika za pribavljanje usluga koje uključuju određivanje potreba za smještajem, prijevozom, pomožućom tehnologijom, stručnom i obrazovnom rehabilitacijom i dugotrajnom brigom.

Jedan od ciljeva mjerenja osoba s teškoćama u Popisu je procjenjivanje pokazatelja i trendova razine njihova funkcioniranja unutar cjelokupnog društva.

Od podataka dobivenih mjerenjem statusa osoba s teškoćama u obavljanju svakodnevnih aktivnosti očekuje se da predstavljaju ne sve, ali veliku većinu takvih osoba u našoj zemlji te najčešća zajednička osnovna ograničenja u aktivnostima.

Pri korištenju podataka o osobama s teškoćama treba imati na umu da su podaci iz Popisa 2011. dobiveni na temelju izjave osobe koja je popisivaču davala podatke, te isti hendikep kod dvije različite osobe može značiti i dva različita odgovora. Npr. osoba kojoj je amputirana noga može izjaviti da nema nikakvih teškoća u obavljanju svakodnevnih aktivnosti i ta osoba nije u Popisu evidentirana kao osoba s teškoćama u obavljanju svakodnevnih aktivnosti, dok neka druga osoba s istim hendikepom može izjaviti drukčije i samim time biti uključena u kontingent osoba s teškoćama u obavljanju svakodnevnih aktivnosti.

Uspostavom registra o osobama s invaliditetom dobila se detaljna spoznaja o broju, vrsti, stupnju i težini oštećenja zdravlja invalidnih osoba (Zakon o Hrvatskom registru o osobama s invaliditetom, NN, br. 64/01., čl. 1. Zakona). Podaci u Registru, za razliku od popisnih, temelje se na zdravstvenoj dokumentaciji i odnose se na invalidne osobe, a podaci u Popisu odnose se na osobe s teškoćama u obavljanju svakodnevnih aktivnosti.

Područno ustrojstvo Republike Hrvatske

Popis je proveden na temelju službenih podataka iz Registra prostornih jedinica koje je priredila Državna geodetska uprava.

Republika Hrvatska, prema stanju na dan 31. ožujka 2011., imala je 21 županiju (uključujući Grad Zagreb), 127 gradova, 429 općina te 6 756 naselja.

Ukupno stanovništvo

U Popisu 2011., u skladu s međunarodnim statističkim standardima, za definiranje ukupnog stanovništva primjenjuje se koncept uobičajenog mjesta stanovanja (place of usual residence).

NOTES ON METHODOLOGY

Introduction

To start with, one may wonder about the usage, that is, the necessity of data on persons with difficulties. The answer is that the knowledge of the number of persons with difficulties, their age and sex structure as well as spatial distribution is crucial in the attempts to solve their problems and meet their needs.

The publication provides data on the share of persons with difficulties in the number of persons without difficulties as well as their age and sex structure in order to assist relevant persons in making appropriate decisions and measures.

On the basis of general data on persons with difficulties, their number and structure, it is possible to plan certain programmes aimed at providing services, including the development of programmes and policies for getting services that encompass the defining of needs for accommodation, transport, technological aids, professional and education rehabilitation and long-term care.

One of the goals of gathering data on persons with difficulties in the Census is to estimate the indicators and trends of the level of their inclusion into society.

The data acquired by measuring the status of persons with difficulties in performing activities of daily living are expected to adequately represent a vast majority of such persons in Croatia as well as the most common limitations in performing said activities.

When using data on persons with difficulties it should be taken into account that the data from the 2011 Census were acquired on the basis of the responses given by the persons surveyed, so the same handicap can be differently reported by two different persons. For example, a person with an amputated leg can give a response saying that he/she does not have any difficulties in performing activities of daily living so the person would not be listed as a person with difficulties in performing everyday activities in the Census, while another person with the same handicap can give a different response and be listed in the contingent of persons with difficulties in performing activities of daily living.

Establishing the Croatian Disabilities Registry provides detailed knowledge on the number, type, degree and severity of health problems of persons with disabilities (the Act on the Croatian Disabilities Registry, NN, No. 64/01, article 1). The data in the Registry, unlike the Census data, are based on medical documentation and refer to persons with disabilities, while the data in the Census refer to persons with difficulties in performing activities of daily living.

Constitution of spatial units of the Republic of Croatia

The Census was carried out on the basis of official data from the Register of Spatial Units provided by the State Geodetic Administration.

According to the situation as on 31 March 2011, the Republic of Croatia had 21 counties (including the City of Zagreb), 127 towns, 429 municipalities and 6 756 settlements.

Total population

In the 2011 Census, according to the international statistical standards, the concept of place of usual residence is used in defining of the total population.

Prema tom konceptu ukupnim stanovništvom naselja Popisa odnosno zemlje smatraju se sve osobe koje u tom naselju odnosno zemlji imaju svoje uobičajeno mjesto stanovanja.

Uobičajenim mjestom stanovanja smatra se ono mjesto u kojem osoba provodi većinu svoga dnevnog odmora bez obzira na kratkotrajnu odsutnost iz tog mjesta (npr. zbog odlaska na odmor, putovanje, liječenje, u posjet i sl.).

U skladu s definicijom uobičajenog mjesta stanovanja, ukupan broj stanovnika obuhvaća:

- osobe koje uoči kritičnog trenutka popisa žive neprekidno u svome uobičajenom mjestu stanovanja barem 12 mjeseci
- osobe koje su tijekom 12 mjeseci uoči kritičnog trenutka popisa došle u svoje uobičajeno mjesto stanovanja s namjerom da u njemu ostanu barem godinu dana.

Dakle, razdoblje od jedne godine i dulje te namjera prisutnosti/odsutnosti od najmanje jedne godine osnovni su kriteriji za uključivanje ili isključivanje osoba iz ukupnog stanovništva zemlje odnosno naselja Popisa.

U skladu s međunarodnom statističkom definicijom ukupnog stanovništva zemlje, članak 15. Zakona o Popisu 2011. definira osobe koje neće biti uključene u ukupan broj stanovnika Republike Hrvatske. To su osobe:

- koje u Republici Hrvatskoj imaju prebivalište, a u kritičnom trenutku Popisa odsutne su dulje od jedne godine ili namjeravaju biti odsutne dulje od jedne godine, a u Republiku Hrvatsku ne dolaze tjedno. Iznimka su diplomatsko i vojno osoblje Republike Hrvatske zajedno s članovima njihovih obitelji, bez obzira na trajanje odsutnosti u inozemstvu
- koje u Republici Hrvatskoj imaju boravište kraće od jedne godine i ne namjeravaju ostati u Republici Hrvatskoj dulje od jedne godine
- studenti koji studiraju u inozemstvu bez obzira na učestalost dolaska u Republiku Hrvatsku, s iznimkom studenata koji svakodnevno prelaze granicu.

Usporedivost popisnih podataka

Podaci Popisa 2011. nisu neposredno usporedivi s podacima Popisa 2001. ni s podacima prijašnjih popisa jer se statistička definicija ukupnog stanovništva primijenjena u Popisu 2011. razlikuje od onih koje su primijenjene u prijašnjim popisima.

Podaci šest popisa stanovništva provedenih nakon Drugoga svjetskog rata, tj. popisa 1948., 1953., 1961., 1971., 1981. i 1991., odnose se na stalno stanovništvo, tj. na osobe s prebivalištem u Republici Hrvatskoj bez obzira na to jesu li u vrijeme popisa bile prisutne u prebivalištu ili ne i bez obzira na duljinu odsutnosti iz prebivališta.

U Popisu 2001. prvi se put pri definiranju ukupnog stanovništva primjenjuje koncept "uobičajenog mjesta stanovanja" i uvodi se razdoblje od jedne godine i dulje kao osnovni kriterij za uključivanje ili isključivanje osobe iz ukupnog stanovništva.

U Popisu 2011. također se primjenjuje koncept "uobičajenog mjesta stanovanja" i prvi se put uvodi namjera odsutnosti/prisutnosti kao dodatni kriterij za uključivanje ili isključivanje osobe iz ukupnog stanovništva.

Iako se podaci obaju popisa, 2001. i 2011., temelje na konceptu "uobičajenog mjesta stanovanja", oni nisu neposredno usporedivi. To je tako najprije zbog namjere odsutnosti/prisutnosti koja se nije prikupljala u Popisu 2001., a potom i stoga što je Popis 2001. u ukupan broj stanovnika uključivao i osobe odsutne godinu i dulje koje su se u mjesto stalnog stanovanja vraćale sezonski i mjesečno (te se osobe u Popisu 2011. ne uključuju u ukupan broj stanovnika).

According to this concept, the total population of the census settlement, or a country respectively, consists of all persons whose place of usual residence is located in that settlement or country.

The place of usual residence is considered a place where a person spends most of his/her daily time, irrespective of a short-term absence from it (e.g. due to going to vacation, trip, medical treatment, visit etc.).

In line with the definition of the place of usual residence, the total population includes the following persons:

- *Those who have lived in their place of usual residence for a continuous period of at least 12 months before the census moment*
- *Those who arrived in their place of usual residence during the 12 months before the census moment with the intention of staying there for at least one year.*

Therefore, the period of one year or longer and the intention of staying of at least one year are the basic criteria for the inclusion or exclusion of persons in/from the total population of the country, that is, the census settlements.

According to the international statistical definition of the total population of a country, Article 15 of the Act on the Census of Population, Households and Dwellings in the Republic of Croatia in 2011 defines persons not to be included in the total population of the Republic of Croatia. These are the following persons:

- *Those who are permanently resident in the Republic of Croatia, but who are at the moment of the Census absent for longer than a year or intend to be absent for longer than a year and do not return on a weekly basis to the Republic of Croatia. An exception will be the diplomatic and military personnel of the Republic of Croatia, together with the members of their families, regardless of the duration of their stay abroad.*
- *Those who have been resident in the Republic of Croatia for less than a year and do not intend to remain in the Republic of Croatia for longer than a year.*
- *Students studying abroad, regardless of the frequency of their return to the Republic of Croatia, with the exception of students who cross the border on a daily basis.*

Comparability of census data

2011 Census data are not directly comparable with the 2001 Census data, nor with the earlier censuses' data due to the different statistical definition of the total population used in the 2011 Census.

Data of six population censuses carried out after the Second World War (1948, 1953, 1961, 1971, 1981 and 1991 censuses) concern permanent residents, that is, the persons with the permanent residence in the Republic of Croatia, irrespective of their actual presence/absence at the time of the census and irrespective of the period of absence.

In the 2001 Census, the concept "place of usual residence" was used for the first time in defining the total population, and the period of one year and more was introduced as a basic criterion in including/excluding a person from the total population.

The 2011 Census also used the concept "place of usual residence", but an intention of staying has been introduced for the first time as an additional criterion in including/excluding a person from the total population.

Although the data of both censuses, in 2001 and 2011, are based on the "place of usual residence" concept, the two cannot be directly compared. Firstly because the intention of staying was not collected in the 2001 Census, and, secondly, due to the fact that the 2001 Census included in the total population persons absent for longer than a year who returned to their residence on a seasonal or monthly basis (these persons are not included in the total population in the 2011 Census).

Objašnjenja uz tablice

Teškoće u obavljanju svakodnevnih aktivnosti

Za razliku od Popisa 2001. kada se pitalo o postojanju nekog oblika invalidnosti, u Popisu 2011. prvi se put postavljalo pitanje ima li osoba teškoća u obavljanju svakodnevnih aktivnosti zbog neke dugotrajne bolesti, invalidnosti ili starosti. Namjera je bila dobiti broj osoba kojima je otežano funkcioniranje u svakodnevnom životu. Odgovor na to pitanje davao se neovisno o potvrdi mjerodavnih državnih institucija kojom se potvrđuje teškoća (invaliditet, oštećenje, hendikep).

Potvrđan odgovor dale su osobe koje zbog neke dugotrajne bolesti, invalidnosti ili starosti imaju teškoća u obavljanju svakodnevnih aktivnosti kod kuće, u školi, na poslu itd.

Teškoće mogu biti npr. pri čitanju/gledanju (unatoč nošenju naočala ili leća), slušanju (unatoč nošenju slušnog aparata), govorenju, kretanju (hodanje, penjanje stepenicama, odlazak u trgovinu), odijevanju, obavljanju osobne higijene te problemi s koncentracijom, u komunikaciji s ljudima i sl.

Ako je osoba imala neki kratkotrajni zdravstveni problem (do 6 mjeseci) koji ju je ograničavao u obavljanju svakodnevnih aktivnosti, npr. slomljenu ruku ili nogu, gripu, upalu pluća i dr., na to pitanje davao se odgovor "Ne", dakle smatralo se da osoba nema teškoća.

Vrste teškoća

Osobe s teškoćama mogle su dati najviše dva odgovora birajući one koje im stvaraju najviše teškoća u obavljanju svakodnevnih aktivnosti. Stoga su u tablici prikazane sve moguće kombinacije vrsta teškoća (jedan odgovor ili kombinacija dvaju odgovora).

Teškoće s vidom odnose se na osobe koje imaju teškoće s vidom unatoč nošenju naočala ili leća.

Teškoće sa sluhom ili govorno-glasovnom komunikacijom odnose se na osobe koje imaju teškoće sa sluhom unatoč korištenju slušnim aparatom ili imaju teškoće s govorom koje su trajnoga karaktera.

Teškoće s pamćenjem, koncentracijom ili u sporazumijevanju s drugima odnose se na osobe koje zaboravljaju ono čega bi se obično sjetile na dnevnoj bazi (npr. obavljanje raznih sitnih poslova, kupnje, plaćanje računa, dolaženje na ugovorene sastanke, pamćenje imena bližnjih, puta do kuće i sl.). Također, taj odgovor daju i osobe koje imaju teškoće s koncentracijom (npr. pri čitanju, pisanju, slušanju drugih osoba i sl.), kao i osobe s teškoćama u sporazumijevanju s drugim ljudima (npr. osobe koje zbog bolesti teško ili nikako nisu sposobne komunicirati s osobama iz svoje okoline te osobe s intelektualnim i/ili mentalnim teškoćama).

Teškoće s kretanjem odnose se na osobe koje imaju teškoća pri hodanju po ravnome ili pri penjanju uz stepenice, odnosno osobe koje se ne mogu samostalno kretati bez pomoći druge osobe ili pomagala u svojoj kući, od prostorije do prostorije, u prostorijama, izvan svoje kuće ili s jednoga na drugi kat.

Ostale teškoće odnose se na ostale teškoće i oštećenja drugih organa i organskih sustava (dišni, cirkulacijski, probavni, endokrini, kože i potkožnog tkiva, urogenitalni i dr.), tj. na dugotrajne zdravstvene probleme koji osobi stvaraju teškoće u svakodnevnom životu 6 mjeseci i više.

Fizička pokretljivost osobe odnosi se na fizičku pokretljivost odnosno fizički status osobe s teškoćama.

Explanations of tables

Difficulties in performing activities of daily living

As opposed to the 2001 Census when a question on any type of disability had been asked, in the 2011 Census a question on difficulties in performing activities of daily living due to a long-term illness, disability or old age was asked. The intention was to obtain the number of persons with difficulties in the functioning in everyday life. The answer to this question was given independently of the certificate issued by competent government institutions confirming the person's difficulties (disability, impairment, handicap).

A positive answer was given by persons who, due to a long-term illness, disability or old age, had difficulties in performing daily activities at home, school, work, etc.

These difficulties may occur, for example, when reading/looking (despite wearing glasses or contact lenses), listening (despite wearing a hearing aid), speaking, moving (walking, climbing up the stairs, going to a store), dressing, performing personal hygiene, difficulties in concentrating, communicating with others, etc.

If persons had temporary medical conditions (lasting no longer than 6 months) that limited them in performing their daily activities, e.g. a broken arm or leg, the flu, pneumonia etc., the answer to the question was "No", so it was considered that they had no difficulties.

Type of difficulty

If persons had multiple difficulties, they could give the maximum of two answers, choosing those that presented the gravest problem in performing their daily activities. Therefore, the table presents all combinations of types of difficulties (one answer or a two-answer combination).

Seeing difficulties refer to persons who have vision problems despite wearing glasses or contact lenses.

Hearing or speaking difficulties refer to persons who have auditory problems despite wearing a hearing aid, or to persons with permanent speech difficulties.

Difficulties in remembering, concentrating or communicating with other people refer to persons who forget what they would normally remember on a daily basis (e.g. performing certain minor tasks, shopping, paying bills, keeping scheduled appointments, remembering the names of family members, the way home and the like). This answer is also to be given by persons having difficulties in concentrating (e.g. while reading, writing, listening to others etc.), as well as those having difficulties in understanding other persons (e.g. persons who, due to an illness, are either completely unable or must make great efforts to communicate with persons around them, or persons with intellectual/mental difficulties).

Mobility difficulties refer to persons who have trouble walking on flat surfaces or climbing up the stairs, that is, persons unable to move without the help of another person or aid inside their house, from room to room, inside rooms, outside their house or from one floor to the next.

Other difficulties refer to all other difficulties and impairments of other organs and systems of organs (respiratory system, circulatory system, endocrine system, skin and subcutaneous tissue, urogenital organs etc.), that is, to long-lasting medical difficulties causing problems in a person's everyday life for 6 months and longer.

Physical mobility of the person refers to the physical mobility, that is, the physical status of a person with difficulties.

Osoba se smatra **sasvim pokretnom** ako se može kretati sama bez ikakvih pomagala i bez pomoći druge osobe.

Osoba se smatra **trajno ograničeno pokretnom uz pomoć štapa, štaka ili hodalice** ako je trajno ograničeno pokretna, i to samo uz neko od navedenih pomagala (uključujući protezu ruke ili noge).

Osoba se smatra **trajno ograničeno pokretnom uz pomoć invalidskih kolica** ako je trajno ograničeno pokretna i može se kretati samo uz pomoć invalidskih kolica.

Trajno nepokretna osoba jest osoba koja je bez mogućnosti samostalnog pokretanja tijela te koja se ne može kretati ni uz kakvu pomoć.

Odgovor "**Ostalo**" daju osobe s ograničenom pokretljivošću ili nepokretnosti za koju se ne može još reći je li trajna (u konačnici i ne mora biti trajna), npr. poslije teških kardioloških operacija, transplantacija, prometnih nesreća, moždanih udara, teških prijeloma (npr. kuka), malignih bolesti kod kojih liječenje i rehabilitacija dugo traju (6 i više mjeseci) i ishod je neizvjestan (izlječenje ili jedna od trajnih kategorija nepokretljivosti).

Uzrok teškoća

Odgovor "**Od rođenja**" odnosi se na osobe koje s teškoćom žive od rođenja (npr. sljepoća, gluhoća, nedovoljna duševna razvijenost, tjelesni deformiteti, oštećenje pri porodu i dr.).

Odgovor "**Domovinski rat ili njegove posljedice**" odnosi se na osobe koje imaju teškoće kao posljedicu ranjavanja/bolesti ili zbog djelovanja zaostalih eksplozivnih naprava nakon rata.

Odgovor "**Profesionalno oštećenje (profesionalna bolest / ozljeda na radu)**" odnosi se na osobe koje zbog posljedica ozljede na radu ili profesionalne bolesti imaju teškoće u obavljanju svakodnevnih aktivnosti.

Odgovor "**Bolest**" odnosi se na osobe koje zbog bilo koje bolesti imaju teškoće u obavljanju svakodnevnih aktivnosti (osim ako je riječ o profesionalnoj bolesti / ozljedi na radu).

Odgovor "**Prometna nesreća**" odnosi se na osobe koje zbog posljedica prometne nesreće imaju teškoće u obavljanju svakodnevnih aktivnosti.

Prometna nesreća jest svaka nesreća koja uključuje sredstvo namijenjeno ili upotrijebljeno u to vrijeme za prijevoz osoba ili dobara s jednog mjesta na drugo. U prometne nesreće uključuju se: stradanja pješaka, stradanja u prijevoznom sredstvu, u prijevozu nemotornih vozila, u prijevozu na vodi, u željezničkom i zračnom prometu.

Odgovor "**Ostalo**" odnosi se na osobe koje zbog neke druge nesreće (npr. u kući, u šetnji, pri sportu) ili trovanja ili zbog starosti imaju teškoće u obavljanju svakodnevnih aktivnosti.

Ako osoba ima više uzroka teškoća, određuje se ona teškoća koja osobi stvara najviše problema u obavljanju svakodnevnih aktivnosti.

Fully mobile persons are persons who are able to move on their own without any aids or without assistance of another person.

Persons are of **permanently limited mobility aided by a cane, crutches or a walking frame** if they are of permanently limited mobility, able to move only with the help of the mentioned aids (including prosthetic arm or leg).

Persons are of **permanently limited mobility aided by wheelchair** if they are of permanently limited mobility, able to move only with the help of a wheelchair.

Permanently immobile persons are persons who are not able to independently move their body or to move even with aids or assistance.

The answer „**Other**“ is given by persons of limited mobility or full immobility that cannot be classified as permanent yet (after all, it does not need to be permanent), e.g., after a major cardiac surgery, transplantation, traffic accidents, strokes, severe fractures (hip), malignant diseases with long-lasting treatments and rehabilitation (more than 6 months) with uncertain outcome (full recovery or one of the categories of permanent immobility).

Cause of difficulty

The answer "**Since birth**" is to be given by persons who have been living with a disability since birth (e.g. blindness, deafness, insufficient mental development, body deformities, injury at birth etc.).

The answer "**Homeland War and its after-effects**" is to be given by persons with disabilities caused by war wounds/illnesses or by explosive devices remained from the war.

The answer "**Occupational impairment (occupational disease/injury at work)**" refers to persons who have difficulties in performing their daily activities due to a work injury or occupational disease.

The answer "**Illness**" is to be given by persons who, due to any kind of illness, have difficulties in performing their daily activities (excluding occupational disease/injury at work).

The answer "**Traffic accident**" is to be given by persons who, due to a traffic accident, have difficulties in performing their activities of daily living.

Traffic accident is every accident in which any transport vehicle intended or used at that time for carrying of persons or goods from one place to the other is involved. Traffic accidents include: injury of pedestrians, injury in a vehicle, in non-motor vehicles, in vessels, in rail or air traffic.

The answer "**Other**" refers to persons who, due to some other type of accident (e.g. in the house, during a walk, while playing sports), poisoning or old age have difficulties in performing daily activities.

If more than one difficulty is present, the one that causes most trouble for the person in performing daily activities is to be determined.

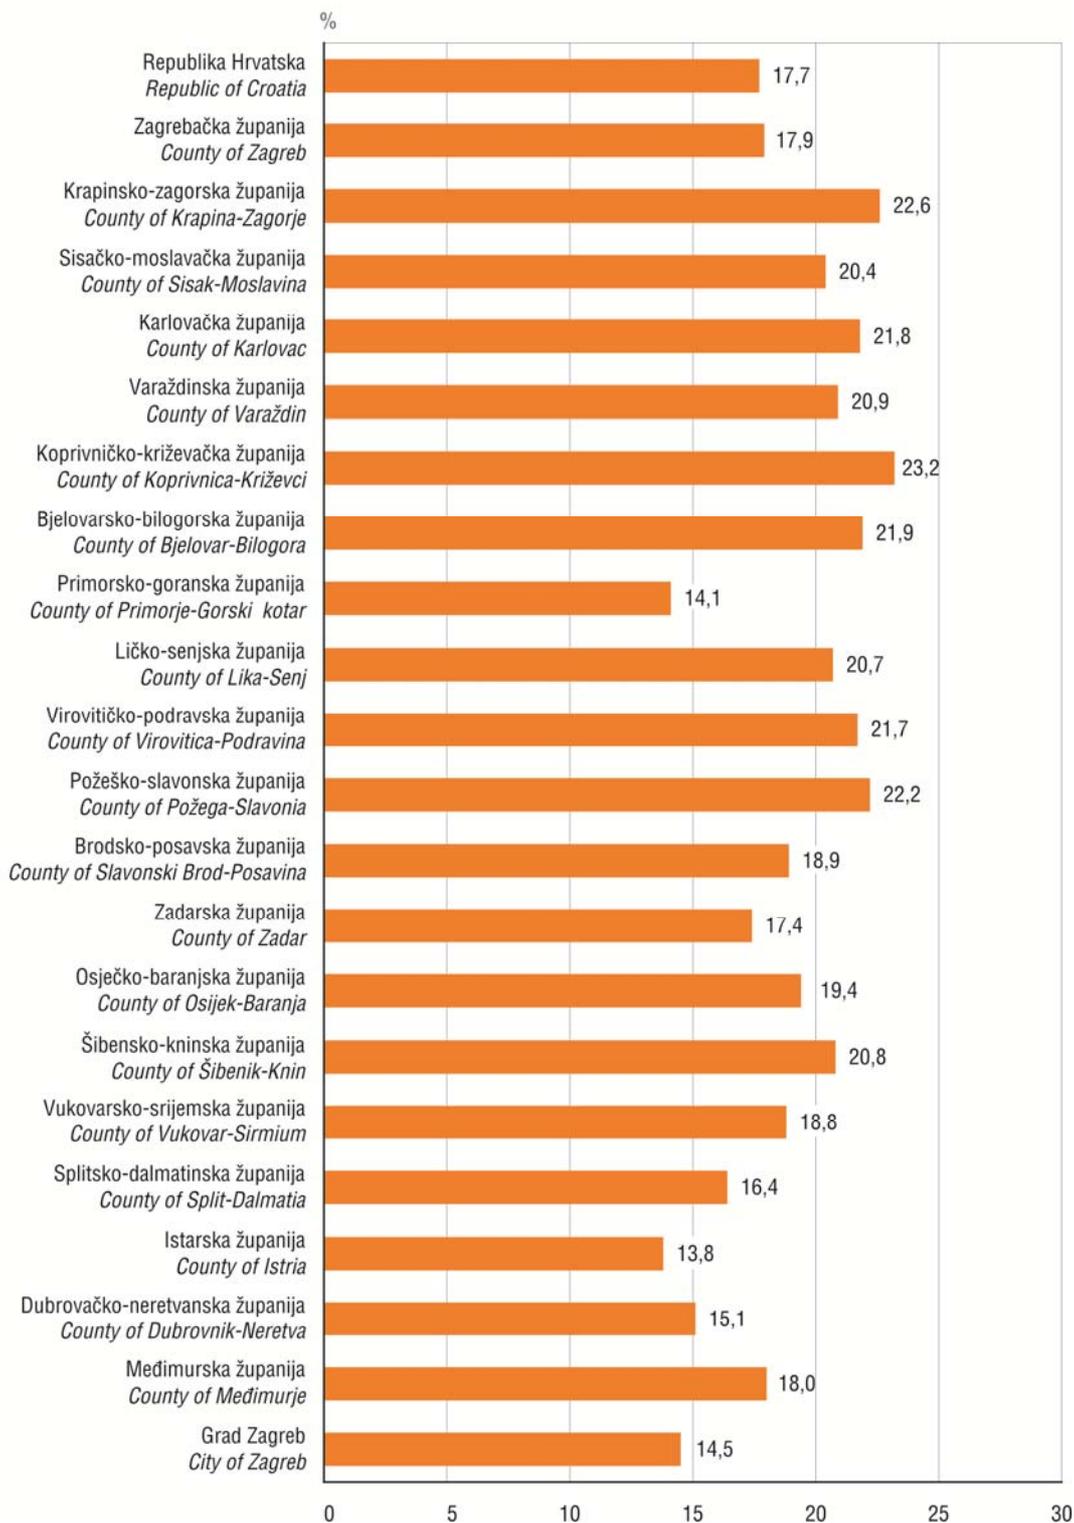

KOMENTAR

Prema Popisu 2011. u Republici Hrvatskoj od 4 284 889 stanovnika njih 759 908 ili 17,7% izjavilo je da imaju teškoća u obavljanju svakodnevnih aktivnosti zbog neke dugotrajne bolesti, invalidnosti ili starosti.

COMMENTARY

According to the 2011 Census, out of the 4 284 889 Croatian citizens, 759 908 or 17.7% of them have reported having difficulties in performing activities of daily living due to a long-term illness, invalidity or old age.

G-1. UDIO OSOBA S TEŠKOĆAMA PO ŽUPANIJAMA, POPIS 2011.
SHARE OF PERSONS WITH DIFFICULTIES, BY COUNTIES, 2011 CENSUS

Najveći je udio osoba s teškoćama (23,2%) u Koprivničko-križevačkoj županiji, gdje od ukupno 115 584 stanovnika 26 802 osobe imaju neki od uzroka teškoća u obavljanju slobodnih aktivnosti. Slijede dvije županije s udjelom većim od 22% i to Krapinsko-zagorska županija s 22,6% i Požeško-slavonska s 22,2%. Nakon njih slijedi još sedam županija s udjelom osoba s teškoćama većim od 20%, i to:

Bjelovarsko-bilogorska županija – 21,9% ili 26 281 osoba s teškoćama na 119 764 stanovnika

Karlovačka županija – 21,8% ili 28 087 osoba s teškoćama na 128 899 stanovnika

Virovitičko-podravska županija – 21,7% ili 18 447 osoba s teškoćama na 84 836 stanovnika

Varaždinska županija – 20,9% ili 36 803 osobe s teškoćama na 175 951 stanovnika

Šibensko-kninska županija – 20,8% ili 22 727 osoba s teškoćama na 109 375 stanovnika

Ličko-senjska županija – 20,7% ili 10 518 osoba s teškoćama na 50 927 stanovnika

Sisačko-moslavačka županija – 20,4% ili 35 186 osoba s teškoćama na 172 439 stanovnika

Uz prethodno navedenih deset županija Republike Hrvatske s udjelom osoba s teškoćama većim od 20%, još pet županija ima veći udio osoba s teškoćama od državnog prosjeka, i to:

Osječko-baranjska županija – 19,4% ili 59 249 osoba s teškoćama na 305 032 stanovnika

Brodsko-posavska županija – 18,9% ili 30 042 osobe s teškoćama na 158 575 stanovnika

Vukovarsko-srijemska županija – 18,8% ili 33 697 osoba s teškoćama na 179 521 stanovnika

Međimurska županija – 18,0% ili 20 527 osoba s teškoćama na 113 804 stanovnika

Zagrebačka županija – 17,9% ili 56 817 osoba s teškoćama na 317 606 stanovnika.

Najmanji je udio osoba s teškoćama u Istarskoj županiji (13,8%). U četiri županije i Gradu Zagrebu, osim u Istarskoj, taj je udio ispod državnog prosjeka. U te četiri županije i Gradu Zagrebu udio je sljedeći:

Zadarska županija – 17,4% ili 29 509 osoba s teškoćama na 170 017 stanovnika

Splitsko-dalmatinska županija – 16,4% ili 74 412 osoba s teškoćama na 454 798 stanovnika

Dubrovačko-neretvanska županija – 15,1% ili 18 482 osobe s teškoćama na 122 568 stanovnika

Primorsko-goranska – 14,1% ili 41 819 osoba s teškoćama na 296 195 stanovnika

Grad Zagreb – 14,5% ili 114 483 osobe s teškoćama na 790 017 stanovnika.

The highest share of persons with difficulties (23.2%) was recorded in the County of Koprivnica-Križevci, where 26 802 of the 115 584 inhabitants listed at least one of the causes of difficulties in performing activities of daily living. The following two counties followed with the highest share of these persons in the total population; Krapina-Zagorje (22.6%) and Požega-Slavonia (22.2%). Seven other counties had the share of persons with difficulties in the total population above 20%:

The County of Bjelovar-Bilogora – 21.9% or 26 281 persons with difficulties of the 119 764 inhabitants

The County of Karlovac – 21.8% or 28 087 persons with difficulties of the 128 899 inhabitants

The County of Virovitica-Podravina – 21.7% or 18 447 persons with difficulties of the 84 836 inhabitants

The County of Varaždin – 20.9% or 36 803 persons with difficulties of the 175 951 inhabitants

The County of Šibenik-Knin – 20.8% or 22 727 persons with difficulties of the 109 375 inhabitants

The County of Lika-Senj – 20.7% or 10 518 persons with difficulties of the 50 927 inhabitants

The County of Sisak-Moslavina – 20.4% or 35 186 persons with difficulties of the 172 439 inhabitants

Out of the remaining counties in the Republic of Croatia, ten had a share of persons with difficulties in the total population larger than 20% and five a share that is higher than the country's average. These are:

The County of Osijek-Baranja – 19.4% or 59 249 persons with difficulties of the 305 032 inhabitants

The County of Slavonski Brod-Posavina – 18.9% or 30 042 persons with difficulties of the 158 575 inhabitants

The County of Vukovar-Sirmium – 18.8% or 33 697 persons with difficulties of the 179 521 inhabitants

The County of Međimurje – 18.0% or 20 527 persons with difficulties of the 113 804 inhabitants and

The County of Zagreb – 17.9% or 56 817 persons with difficulties of the 317 606 inhabitants

The County of Istria had the lowest share of persons with difficulties in the total population (13.8%). In four counties as well as in the City of Zagreb, excluding the County of Istria, this share was lower than the country average. These counties and the City of Zagreb had the following shares:

The County of Zadar – 17.4% or 29 509 persons with difficulties of the 170 017 inhabitants

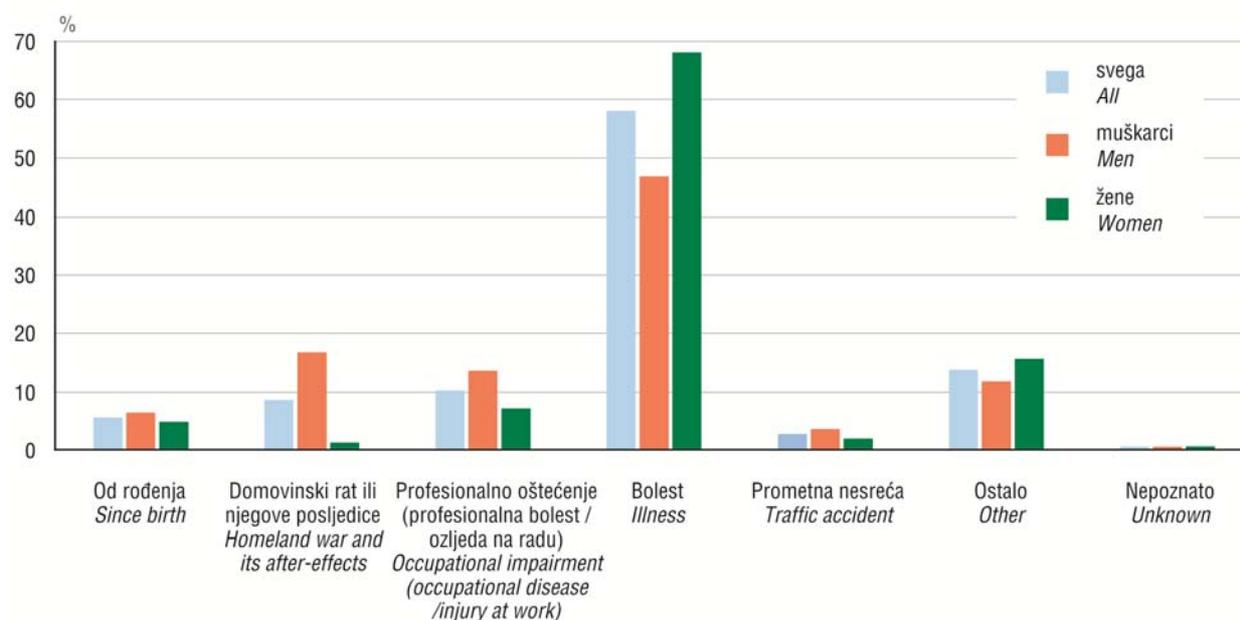

The County of Split-Dalmatia – 16.4% or 74 412 persons with difficulties of the 454 798 inhabitants

County of Dubrovnik-Neretva – 15.1% or 18 482 persons with difficulties of the 122 568 inhabitants

The County of Primorje-Gorski kotar – 14.1% or 41 819 persons with difficulties of the 296 195 inhabitants and

The City of Zagreb – 14.5% or 114 483 persons with difficulties of the 790 017 inhabitants

G-2. OSOBE S TEŠKOĆAMA PREMA UZROKU TEŠKOĆE, POPIS 2011.
PERSONS WITH DIFFICULTIES, BY CAUSE OF DIFFICULTY, 2011 CENSUS

Kada se promatraju osobe s teškoćama prema spolu i pojedinim uzrocima teškoća, u Republici Hrvatskoj od rođenja su bile 43 073 osobe s teškoćama od ukupnog broja tih osoba ili 5,7%. Od toga na muškarce otpada 23 455 ili 6,5% od ukupnog broja muškaraca s teškoćama, a na žene 19 618 ili 4,9%.

Looking at the data on persons with difficulties according to sex and individual causes of the difficulties in the Republic of Croatia, 43 073 or 5.7% of the total number of persons with difficulties were born with those difficulties. Of that number, 23 455 persons or 6.5% of the total number of persons with difficulties were male, while 19 618 or 4.9% of the total were female.

Promatraju li se osobe s teškoćama čiji je uzrok Domovinski rat ili njegove posljedice tada se može primijetiti velika razlika između muškaraca i žena. Ako se gleda međusobni odnos žena i muškaraca, od ukupnog broja osoba s tim uzrokom koji iznosi 65 805 osoba, na muškarce otpada 60 385 osoba ili 91,8%, a na žene 5 420 osoba ili 8,2%. U odnosu na ostale uzroke, na Domovinski rat i njegove posljedice otpada ukupno 8,7%, i to na muškarce 16,7%, a na žene 1,4%.

Looking at the data on persons with difficulties that were a direct or indirect effect of the Homeland War shows that there is a significant difference between sexes. Looking at the male-female relation, out of the total number of persons with difficulties with that cause, 60 385 persons or 91.8% were male and 5 420 persons or 8.2% were female. Comparing this cause to other causes, Homeland War accounts for 8.7% of all the causes – 16.7% of all men with difficulties and 1.4% of all women reported it as the cause of the difficulties they have.

Profesionalno oštećenje uzrok je na koji otpada 10,3% ili 78 170 osoba s teškoćama, i to na muškarce 13,7% ili 49 406 osoba, a na žene 7,2% ili 28 764 osobe.

Occupational injuries were listed as the cause of difficulties of 78 170 or 10.3% of the total number of persons with difficulties, that is, 49 406 or 13.7% of all males and 28 764 or 7.2% of females.

Najčešći uzrok teškoća je bolest. Tako je taj uzrok zastupljen s 441 115 osoba, tj. njegov udio iznosi 58%. Kod muškaraca je Bolest kao uzrok teškoće zastupljena sa 169 097 osoba ili 46,9%, a kod žena taj je uzrok zastupljen s 272 018 osoba ili 68,1%.

The most frequent cause of difficulties is illness. That cause covers 441 115 persons, that is, 58% of the total number of persons with difficulties. A total of 169 097 or 46.9% of males and a total of 272 018 or 68.1% of women listed an illness as the cause of their difficulties.

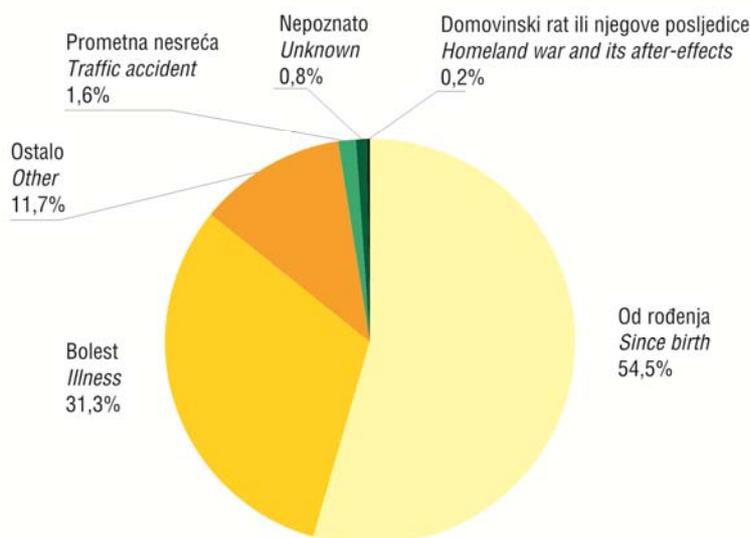

Prometna nesreća najmanje je zastupljena kao uzrok teškoće te je u Popisu 2011. izjavilo da je ona uzrok njihovih teškoća 21 466 osoba ili 2,8%. Njezin udio u odnosu na ukupan broj osoba s teškoćama kod muškaraca iznosi 3,7%, a kod žena 2,1%.

Traffic accident is the least common cause, selected by 21 466 or 2.8% of persons in the 2011 Census. Its share in the total number of persons with difficulties was 3.7% for men and 2.1% for women.

Ostalo se odnosi na osobe koje zbog neke druge nesreće (npr. u kući, u šetnji, pri sportu) ili trovanja ili zbog starosti imaju teškoće u obavljanju svakodnevnih aktivnosti. Na uzrok ostalo otpada 13,9% – kod muškaraca on iznosi 11,9%, a kod žena 15,6%.

Other refers to persons who have difficulties in performing everyday activities due to other accidents (in-house accidents, sporting accidents, and so on), poisoning or old age. Other causes accounted for 13.9% of all causes with 11.9% for men and 15.6% for women.

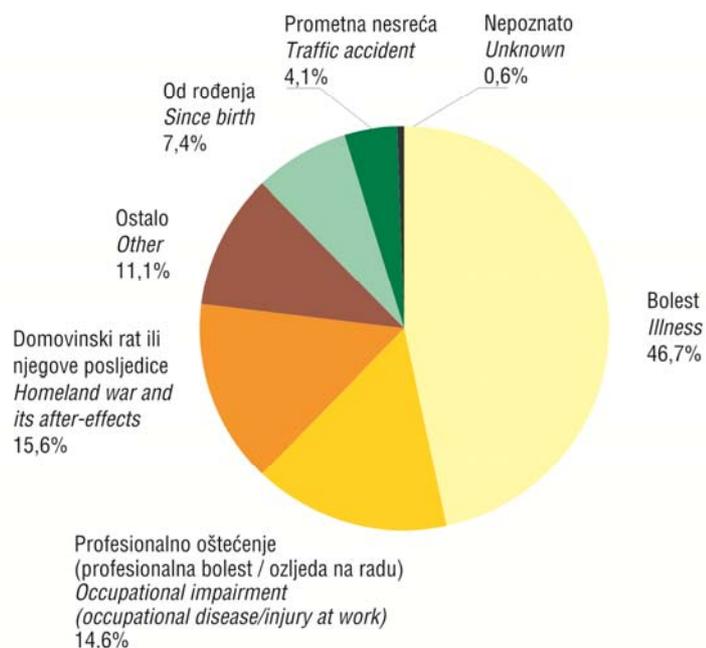

G-3. OSOBE S TEŠKOĆAMA STARE OD 0 DO 19 GODINA PREMA UZROKU TEŠKOĆE, POPIS 2011.
PERSONS WITH DIFFICULTIES AGED 0 – 19, BY CAUSE OF DIFFICULTY, 2011 CENSUS

Ukupan broj osoba od 0 do 19 godina s teškoćama u obavljanju svakodnevnih aktivnosti iznosi 26 207. U kontingentu mladih osoba do 19 godina najviše zastupljen uzrok teškoća je onaj od rođenja, a iznosio je 14 284 osoba ili 54,5%. Sljedeći uzrok je bolest sa 8 193 osobe ili 31,3%, zatim uzrok ostalo s 11,7%, te prometna nesreća s 1,6%. Najmanje zastupljen uzrok teškoća je Profesionalno oštećenje (profesionalna bolest / ozljeda na radu) s 12 osoba ili 0,0%.

The total number of persons aged 0 – 19 with difficulties in performing activities of daily living was 26 207. In the contingent of young persons up to 19 years of age, the most commonly reported cause of these difficulties was Since birth, which amounted to 14 284 persons or 54.5%. The second most commonly reported cause was Illness, amounting to 8 193 persons or 31.3%, Other with 11.7% and Traffic accident with 1.6%. The least common reported cause was Injury at work with 12 persons, or 0.0%.

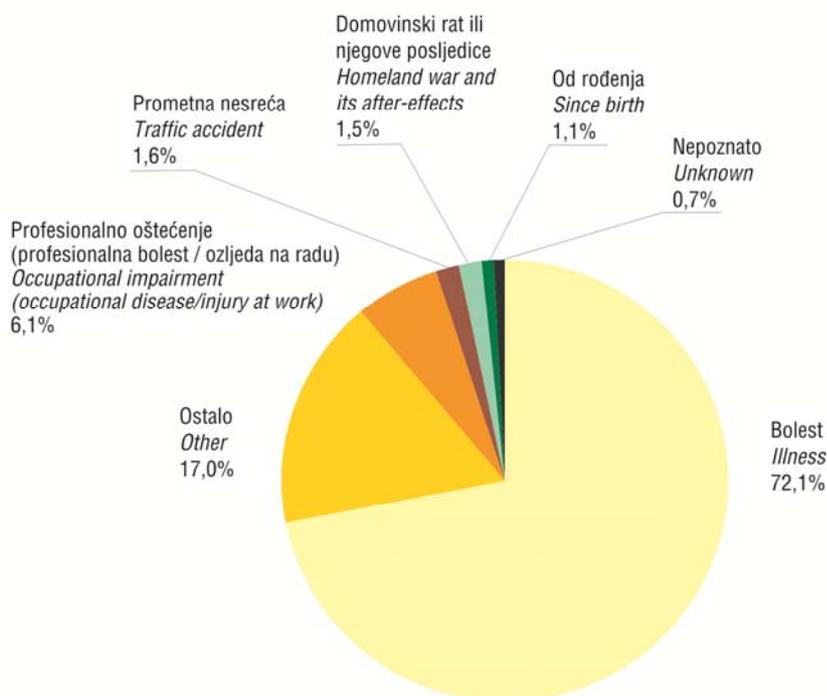

G-4. RADNI KONTINGENT OSOBA S TEŠKOĆAMA PREMA UZROKU TEŠKOĆE, POPIS 2011.
WORKING CONTINGENT OF PERSONS WITH DIFFICULTIES BY CAUSE OF DIFFICULTY, 2011 CENSUS

Prema Popisu 2011. radni kontingent sačinjavale su iste dobne skupine muškaraca i žena, i to od 15 do 64 godine. U ovom kontingentu bolest je najveći uzrok teškoća s 46,7%. Veći je kod žena (99 804 osobe što iznosi 60,4%) nego kod muškaraca (81 460 osoba što iznosi 36,5%). Zatim slijedi uzrok Domovinski rat i njegove posljedice s 15,6% u kojem je udio muškaraca s 25,6% mnogo veći od udjela žena koji iznosi 2,1%. Profesionalno oštećenje (profesionalna bolest / ozljeda na radu) je uzrok teškoće koji je u radnom kontingentu zastupljen s 14,6%, te je veći kod muškaraca (35 605 ili 15,6%) nego kod žena (21 043 ili 12,7%). S udjelom od 11,1% ili za 43 114 osoba s teškoćama radnog kontingenta jesu ostali uzroci. Uzrok od rođenja sudjeluje s 28 604 osobe s teškoćama što je 7,4%, a njegov udio kod žena (7,8%) nešto je veći od onoga kod muškaraca (7,1%). Prometna nesreća je za populaciju ovoga kontingenta prouzročila 4,1% osoba s teškoćama, i to kod muškaraca 4,6%, a kod žena 3,3%.

According to the 2011 Census, the working contingent was comprised of the same male and female age groups aged between 15 and 64. In this contingent, illness was the most common cause of difficulties, accounting for 46.7% of the total number. It was more common with women (99 804 women or 60.4%) than men (81 460 or 36.5%). It was followed by the cause Homeland War and its after-effects with 15.6%, in which the share of men was much higher, 25.6%, than of women, 2.1%. Injury at work was the cause of difficulties in the working contingent for 14.6% of persons and was more common for men (35 605 or 15.6%) than for women (21 043 or 12.7%). Other cause accounted for 11.1% or 43 114 persons of the working contingent. Since birth cause accounted for 28 604 persons or 7.4%, while it accounted for a larger share of women (7.8%) than men (7.1%). Traffic accident as the cause accounted for 4.1% of persons, that is, for 4.6% of men and 3.3% of women.

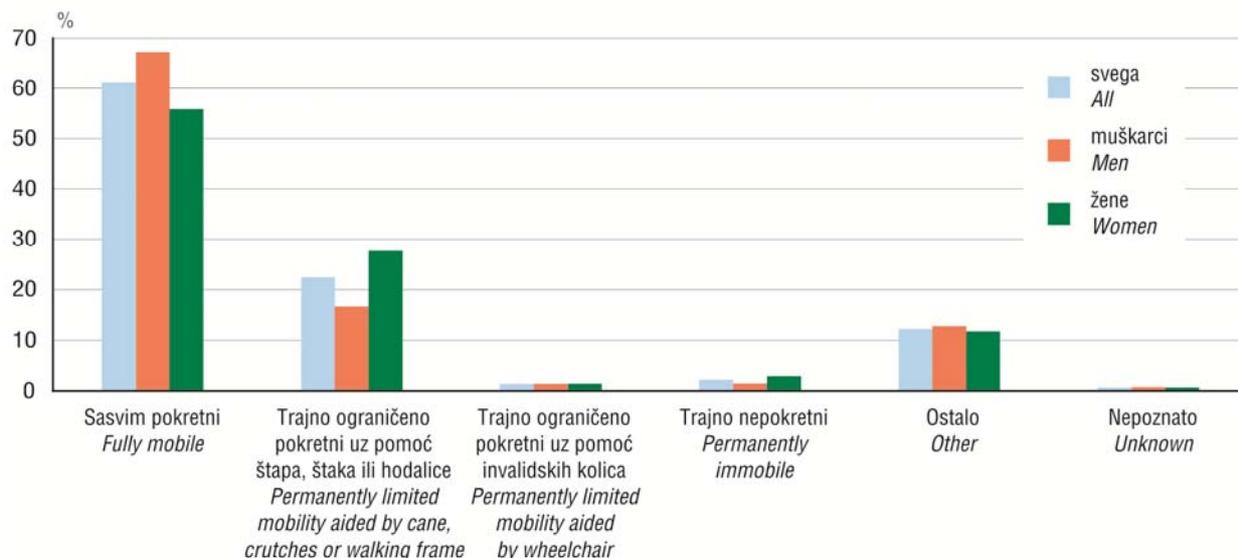

G-5. OSOBE S TEŠKOĆAMA STARE 65 I VIŠE GODINA PREMA UZROKU TEŠKOĆE, POPIS 2011.
PERSONS WITH DIFFICULTIES AGED 65 AND OVER, BY CAUSE OF DIFFICULTY, 2011 CENSUS

Od ukupnog broja osoba s teškoćama starog 65 i više godina koji iznosi 353 247, najveći uzrok teškoća je bolest koji obuhvaća 254 523 osobe ili 72,1%. Taj udio kod žena iznosi 75,1%, a kod muškaraca 66,7%. Udio osoba s teškoćama starije populacije (65 i više godina) za koje je uzrok teškoća Domovinski rat i njegove posljedice trostruko je veći kod muškaraca (2,6%) nego kod žena (0,8%). Udio osoba s teškoćama za koje je uzrok Profesionalno oštećenje (profesionalna bolest / ozljeda na radu) (6,1%) također je trostruko veći kod muškaraca (10,9%) nego kod žena (3,4%). Prometna nesreća uzrok je teškoća za 1,6% osoba s teškoćama starih 65 i više godina, odnosno prema spolu taj udio iznosi 2,2% za muškarce i 1,2% za žene. Ostali razlozi teškoća uzrok su teškoća kod 17% osoba starih 65 i više godina, tj. 17,7% kod žena i 15,8% kod muškaraca. Na uzrok od rođenja otpada 1,1% populacije s teškoćama stare 65 i više godina.

Out of the 353 247 persons with difficulties aged 65 and over, the most common cause was illness, which accounted for 254 523 persons or 72.1%. It accounted for 75.1% of women and 66.7% of men. The share of persons with difficulties in the elderly population (65 years and over) who reported the Homeland War and its after-effects as the cause was three times higher for men (2.6%) than for women (0.8%). The share of persons with difficulties who reported Injury at work as the cause was 6.1% and was three times larger for men (10.9%) than for women (3.4%). Traffic accident accounted for 1.6% of persons with difficulties aged 65 and over, with a share of 2.2% for men and 1.2% for women. Other cause accounted for 17% of persons aged 65 and over, that is, 17.7% of women and 15.8% of men. Since birth cause accounted for 1.1% of persons with difficulties aged 65 and over.

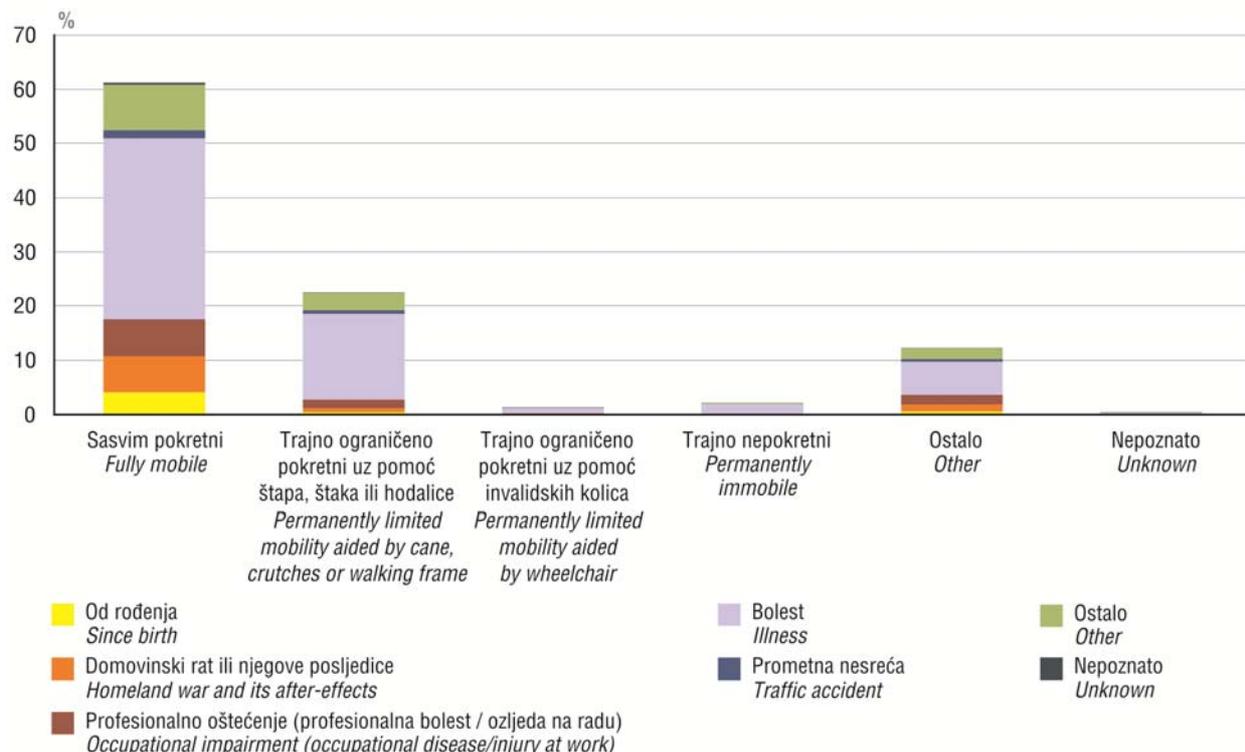

G-6. OSOBE S TEŠKOĆAMA PREMA FIZIČKOJ POKRETLJIVOSTI I SPOLU, POPIS 2011.
PERSONS WITH DIFFICULTIES, BY PHYSICAL MOBILITY AND SEX, 2011 CENSUS

Ako se promatraju osobe s teškoćama prema fizičkoj pokretljivosti, tada od ukupnog broja osoba s teškoćama u Republici Hrvatskoj njih 465 544 ili 61,3% osoba sasvim je pokretno; gledajući prema spolu 242 520 ili 67,2% muškaraca i 223 024 ili 55,9% žena s teškoćama sasvim je pokretno. Trajno ograničeno pokretnih uz pomoć štapa, štaka ili hodalice ima 170 582 ili 22,4%, u kojem udio kod žena iznosi 27,7%, a udio kod muškaraca 16,7%. Trajno ograničeno pokretnih uz pomoć invalidskih kolica ima 10 910 ili 1,44%, a trajno nepokretnih 17 081 ili 2,2%. Udio trajno nepokretnih žena u odnosu na ukupan broj žena s teškoćama (2,9%) gotovo je dvostruko veći od udjela trajno nepokretnih muškaraca (1,5%).

Concerning the physical mobility of persons with difficulties, 465 544 or 61.3% of them have no limitations regarding mobility, that is, 242 520 or 67.2% of men and 223 024 or 55.9% of women. There were 170 582 persons that have permanently limited mobility aided by a cane, crutches or a walking frame or 22.4% of the total number, that is, 27.7% of women and 16.7% of men. Permanent mobility limitations that necessitate the use of a wheelchair were recorded for 10 910 or 1.44% of persons. The share of women with limited mobility in the total number of women with difficulties was almost double (2.9%) that of men (1.5%).

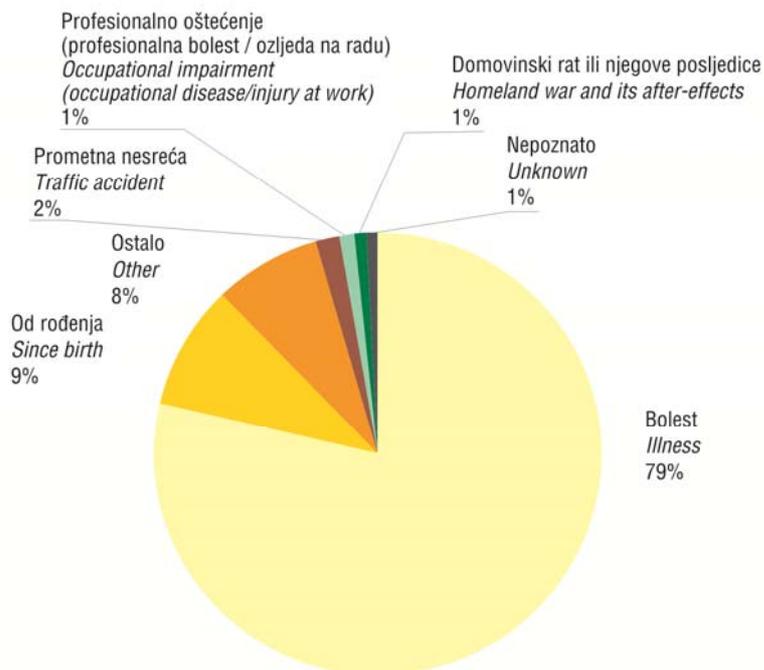

G-7. OSOBE S TEŠKOĆAMA PREMA UZROKU TEŠKOĆA I FIZIČKOJ POKRETLJIVOSTI, POPIS 2011.
PERSONS WITH DIFFICULTIES, BY CAUSE OF DIFFICULTY AND PHYSICAL MOBILITY, 2011 CENSUS

Usporedbom podataka fizičke pokretljivosti i uzroka teškoća dolazi se do zaključka da je od 31 610 osoba s teškoćama, čija je teškoća od rođenja, trajno nepokretno 3,6%, 3,7% trajno ograničeno pokretno uz pomoć invalidskih kolica i 8,3% trajno ograničeno pokretno uz pomoć štapa, štaka ili hodalice. Od ukupno 65 805 osoba s teškoćama čiji su uzroci Domovinski rat i njegove posljedice, trajno nepokretnih je 0,2%, trajno ograničeno pokretno uz pomoć invalidskih kolica je 0,5%, trajno ograničeno pokretno uz pomoć štapa, štaka ili hodalice je 8,3% a 76,1% je sasvim pokretnih. Od ukupno 78 170 osoba s teškoćama izazvanih profesionalnim oštećenjem, njih 65,8% sasvim je pokretno, a njih 15,6% kreće se uz pomoć štapa, štaka ili hodalice, njih 0,4% kreće se uz pomoć invalidskih kolica, a 0,3% je nepokretno. S Bolešću kao uzrokom teškoća od 441 115 osoba s teškoćama izazvala je prometna nesreća, od kojih je 57,4% sasvim pokretno, 27,0% pokretno uz pomoć štapa, štaka ili hodalice, njih 1,6% pokretno uz pomoć invalidskih kolica, a 3,0% trajno nepokretno.

By comparing the data on physical mobility and the cause of difficulties it can be concluded that, of 31 610 persons with difficulties since birth, 3.6% were permanently immobile, 3.7% have permanently limited mobility aided by a wheelchair and 8.3% have permanently limited mobility aided by a cane, crutches or a walking frame. Of the 65 805 persons with difficulties whose cause is the Homeland War and its after-effects, 0.2% were permanently immobile, 0.5% had permanently limited mobility aided by a wheelchair, 8.3% had permanently limited mobility aided by a cane, crutches or a walking frame and 76.1% had no limitations regarding physical mobility. Of the 78 170 persons with difficulties caused by an occupational injury, 65.8% of them were completely mobile, 15.6% of them were mobile aided by a cane, crutches or walking frame, 0.4% of them were mobile aided by a wheelchair and 0.3% of them were immobile. Of the 441 115 persons with difficulties that listed illness as the cause of their difficulties, 13 414 or 3.0% of them were permanently immobile and 1.6% or 7 128 of them were mobile aided by a wheelchair. Traffic accident was listed as the cause of difficulties by 21 466 persons, of which 57.4% were completely mobile, 27.0% were mobile aided by a cane, crutches or a walking frame, 1.6% of them were mobile with aided by a wheelchair and 3.0% of them were permanently immobile.

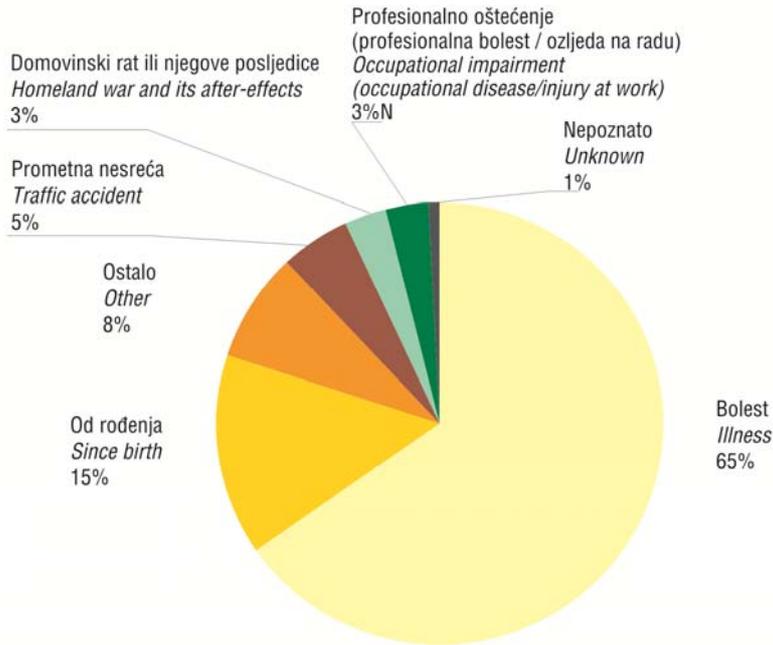

G-8. TRAJNO NEPOKRETNOST OSOBE PREMA UZROKU TEŠKOĆA, POPIS 2011.
PERMANENTLY IMMOBILE PERSONS, BY CAUSE OF DIFFICULTY, 2011 CENSUS

Od 17 081 trajno nepokretne osobe s teškoćama najveći je udio, i to 78,5% ili 13 414 osoba, s Bolešću kao uzrokom teškoće; zatim su 1 572 osobe s teškoćama ili 9,2% s teškoćama Od rođenja; ostali uzroci osoba s teškoćama odnose se na 7,8% trajno nepokretnih osoba s teškoćama; na osobe s teškoćama kojima je uzrok teškoća prometna nesreća odnosi se 1,6%, a na profesionalno oštećenje i Domovinski rat uzrok su teškoćama za 1,2%, odnosno 0,9% trajno nepokretnih osoba.

Of the 17 081 permanently immobile persons with difficulties, the largest share, 78.5%, or 13 414 persons reported illness as the cause of their difficulties, followed by Since birth cause, accounting for 9.2% or 1 572 persons, Others cause accounted for 7.8% of permanently immobile persons with difficulties; Traffic accident cause accounted for 1.6% while occupational injury and Homeland War causes accounted for 1.2% and 0.9% of permanently immobile persons, respectively.

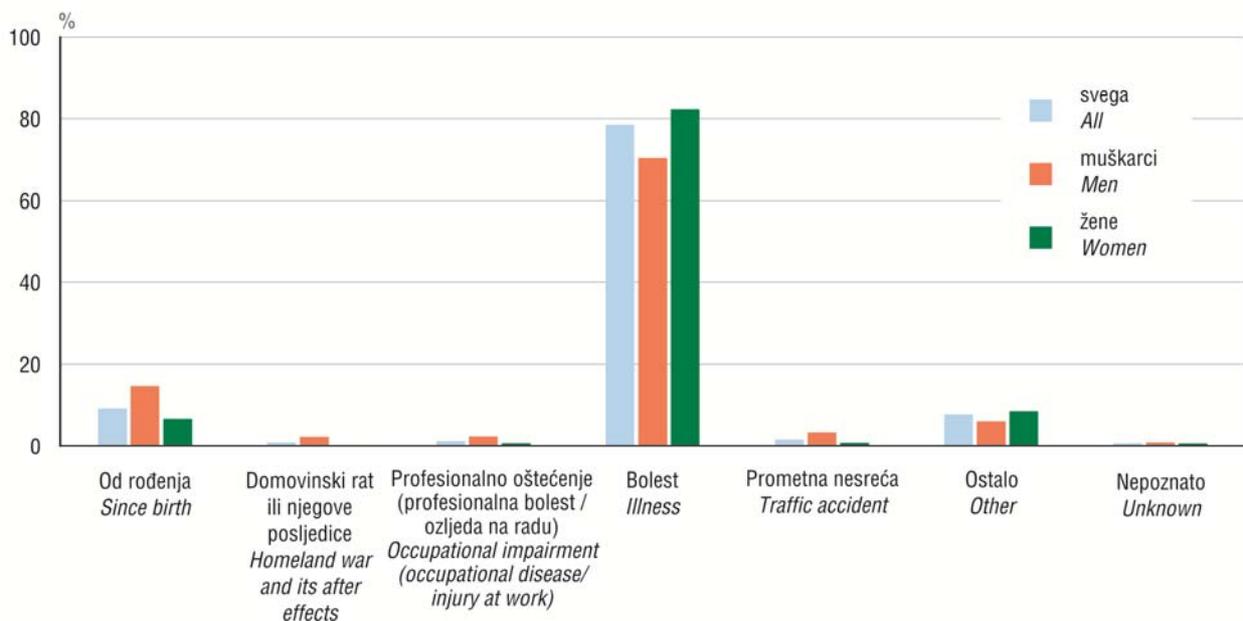

G-9. TRAJNO OGRANIČENO POKRETNE OSOBE UZ POMOĆ INVALIDSKIH KOLICA PREMA UZROKU TEŠKOĆA, POPIS 2011.
PERSONS OF PERMANENTLY LIMITED MOBILITY AIDED BY WHEELCHAIR, BY CAUSE OF DIFFICULTY, 2011 CENSUS

Kada se promatraju podaci o osobama s teškoćama koje su ograničeno pokretne uz pomoć invalidskih kolica, od ukupno 10 910 osoba, njih 65,3% ili 7 128 osoba trajno je ograničeno u kretanju zbog bolesti, za 14,7% ili 1 602 osobe teškoće postoje od rođenja, u 8,0% slučajeva ostali su razlozi teškoća, na teškoće kojima je uzrok prometna nesreća otpada 5,2%, a na osobe pokretne uz pomoć invalidskih kolica kojima su uzrok teškoće profesionalno oštećenje i Domovinski rat otada 3,0%.

Concerning the data on persons with difficulties which have limited mobility aided by a wheelchair, out of the 10 910 persons, 65.3% or 7 128 of them had limited mobility due to an illness, 14.7% or 1 602 of them had difficulties since birth, 8.0% of them had difficulties due to other causes, 5.2% of them had difficulties due to traffic accidents, while 3.0% of them had difficulties due to an occupational injury and the Homeland War.

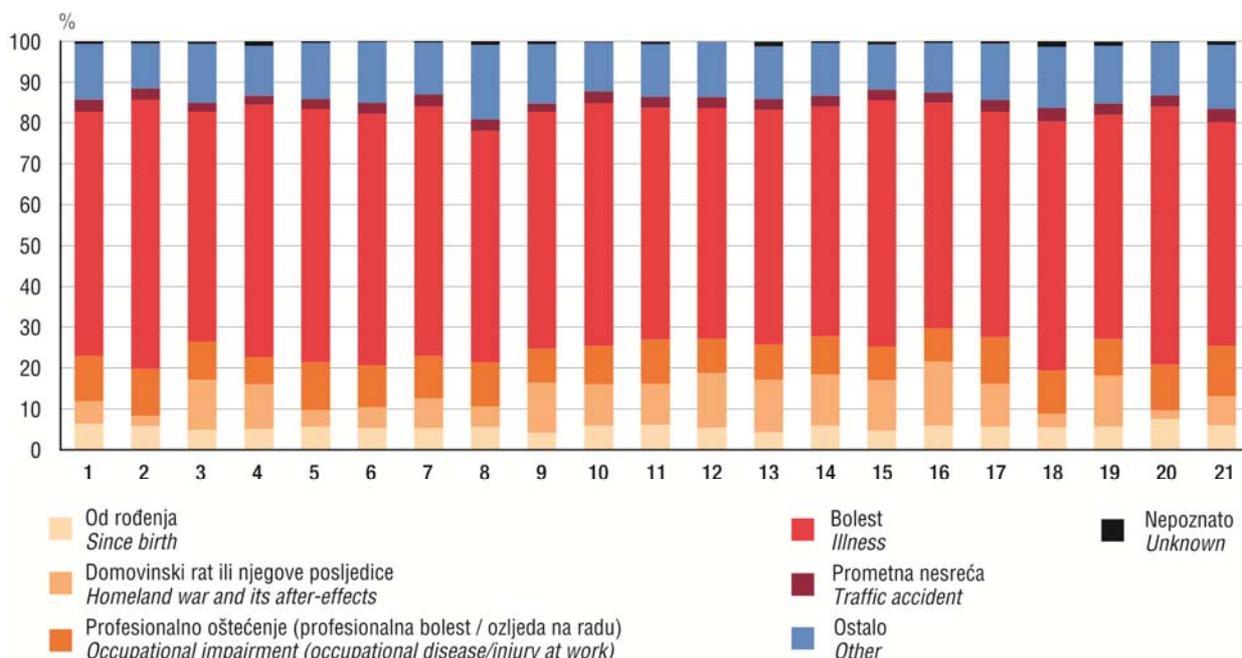

G-10. TRAJNO NEPOKRETNE OSOBE PREMA UZROKU TEŠKOĆE I SPOLU, POPIS 2011.
PERMANENTLY IMMOBILE PERSONS, BY CAUSE OF DIFFICULTY AND SEX, 2011 CENSUS

Podaci Popisa 2011. pokazuju da od ukupno 17 081 trajno nepokretne osobe u Republici Hrvatskoj njih 5 419 ili 31,7% otpada na muškarce i 11 662 ili 68,3% na žene. Iz toga proizlazi da je broj nepokretnih žena više nego dvostruko veći od nepokretnih muškaraca. Promatra li se podatak o nepokretnim ženama s obzirom na uzrok teškoće, najveći udio, i to 82,3%, odnosi se na Bolest kao uzrok teškoće, zatim na uzrok Ostalo, na koji se odnosi 8,5% nepokretnih žena, s 6,7% su razlozi Od rođenja, a zatim slijede prometna nesreća s 0,8%, profesionalno oštećenje s 0,7% i Domovinski rat i njegove posljedice s 0,3%. Kako kod nepokretnih žena, tako i kod nepokretnih muškaraca najveći udio, s obzirom na uzrok teškoće, odnosi se na Bolest. Međutim, on ipak nije tako jako izražen kao kod žena i iznosi 70,4%. Slijedi uzrok Od rođenja s 14,7%, zatim ostalo sa 6,1%, prometna nesreća s 3,3%, profesionalna bolest s 2,4% i na kraju Domovinski rat s 2,3%.

The 2011 Census data show that out of the 17 081 permanently immobile persons in the Republic of Croatia 5 419 or 31.7% of them were men and 11 662 or 68.3% were women. This shows that the number of immobile women is double the number of immobile men. Looking at the data on immobile women by cause, Illness had the largest share, 82.3%, followed by Other, 8.5%, Since birth, 6.7%, Traffic accident, 0.8%, occupational injury, 0.7% and Homeland War and its after-effects, 0.3%. Illness was the most common cause of difficulties for immobile women, as well as for immobile men. However, it was less common for women, accounting for 70.4% of the total number. It is followed by the Since birth cause, 14.7%, Other cause, 6.1%, Traffic accident, 3.3%, Profession-related injury, 2.4% and Homeland War, 2.3%.

G-11. UDIO OSOBA S TEŠKOĆAMA PREMA UZROKU TEŠKOĆA PO ŽUPANIJAMA, POPIS 2011.

07 Bjelovarsko-bilogorska županija County of Bjelovar-Bilogora	14 Osječko-baranjska županija County of Osijek-Baranja	21 Grad Zagreb City of Zagreb

Promatraju li se osobe s teškoćama s obzirom na pojedine uzroke teškoća, u Republici Hrvatskoj od rođenja su bile 43 073 osobe s teškoćama ili 5,7% od ukupnog broja svih osoba s teškoćama. U Međimurskoj županiji taj je udio najviši (7,5%), tj. od ukupno 20 527 osoba s teškoćama njih 1 542 imaju teškoće od rođenja. Slijede Zagrebačka županija s udjelom od 6,4% te Požeško-slavonska sa 6,1% i Grad Zagreb sa 6,0%. Uz četiri navedene županije, još je u četiri županije taj udio veći od prosječnog udjela za Republiku Hrvatsku; u tri županije taj je udio identičan udjelu Republike Hrvatske, a u ostalih deset županija udio je niži od prosjeka, s tim da je najmanji u Ličko-senjskoj županiji (4,2%).

Looking at persons with difficulties by individual causes of difficulties, 43 073 or 5.7% of persons with difficulties had those difficulties Since birth. The County of Međimurje had the largest share of persons with difficulties since birth, 1 542 or 7.5% of the total 20 527 persons with difficulties. County of Zagreb has the second largest share of persons with difficulties Since birth, 6.4%, followed by the County of Požega-Slavonia with 6.1% and the City of Zagreb with 6.0%. Apart from these four counties, four other counties had a share higher than the average for the Republic of Croatia, three had a share equal to the country average and in the remaining ten counties the share was below average, with the County of Lika-Senj having the smallest share (4.2%).

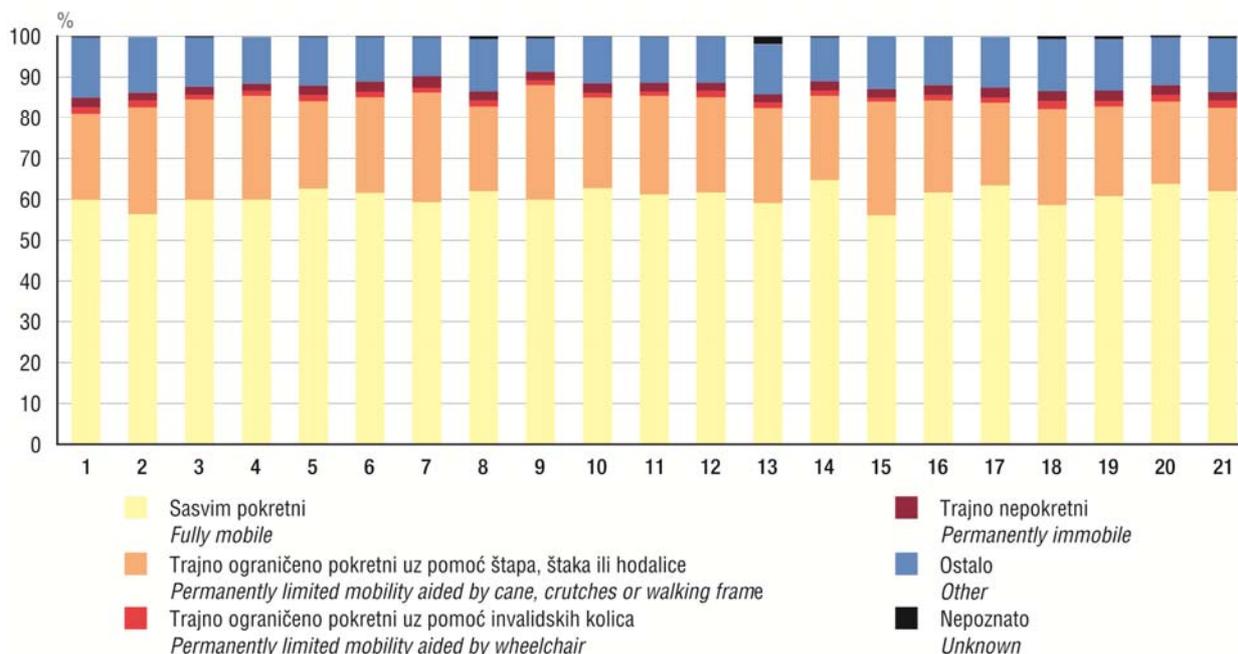

Promatraju li se osobe s teškoćama čiji je uzrok teškoća Bolest, na razini države je udio osoba s teškoćama 58,0% ili 441 115, s tim da se udio kreće od 65,9% u Zadarskoj županiji do 54,7% u Međimurskoj županiji. Uz Međimursku županiju samo još Požeško-slavonska županija s 54,9% ima udjel osoba s teškoćama, čiji je uzrok bolest, manji od 55%.

U Republici Hrvatskoj od ukupnog broja osoba s teškoćama na osobe kojima je uzrok teškoća prometna nesreća opada 2,8% ili 21 466 osoba. Županije s najvišim udjelom osoba s teškoćama kojima je uzrok prometna nesreća jesu Vukovarsko-srijemska i Međimurska s 3,4%, slijedi Zadarska s udjelom od 3,1% te još četiri županije, među kojima i Grad Zagreb, koje su iznad državnog prosjeka. Karlovačka i Sisačko-moslavačka s udjelom od 2,2% te Ličko-senjska s 2,1% županije su s najnižim udjelom osoba s teškoćama kojima je uzrok teškoće prometna nesreća.

Looking at persons with difficulties caused by illness, the share of persons with difficulties at the country level was 58.0% or 441 115 persons, with the share varying from 65.9% in the County of Zadar to 54.7% in the County of Međimurje. Apart from the County of Međimurje, only other county with a share of persons with difficulties caused by illness less than 55% was the County of Požega-Slavonia with 54.9%.

Out of the total number of persons with difficulties in the Republic of Croatia, those whose difficulties were caused by a traffic accident accounted for 2.8%, or 21 466 persons. Counties with the highest share of persons with difficulties caused by traffic accidents were the County of Vukovar-Sirmium and the County of Međimurje with 3.4%, followed by the County of Zadar with a share of 3.1% and four other counties, including the City of Zagreb, with a share higher than the country's average. County of Karlovac and Sisak-Moslavina with a share of 2.2% and Lika-Senj with 2.1% are the counties with the lowest share of persons with difficulties caused by traffic accidents.

Promatra li se fizička pokretljivost osoba s teškoćama po županijama, udio sasvim pokretnih, koji je na razini Republike Hrvatske 61,3%, kreće se od 56,1% u Šibensko-kninskoj i 56,4% u Krapinsko-zagorskoj županiji do najvišega u Osječko-baranjskoj županiji od 64,7%, Međimurskoj od 63,8% i Splitsko-dalmatinskoj od 63,4%.

Najveći udio osoba s teškoćama koje su trajno ograničeno pokretne uz pomoć štapa, štaka ili hodalice nalazi se u Ličko-senjskoj županiji s 28,0% i Šibensko-kninskoj s 27,9%, a najniži u Međimurskoj županiji s 20,2%, Splitsko-dalmatinskoj s 20,3% te u Gradu Zagrebu s 20,5%. Na razini države udio tih osoba s teškoćama iznosi 22,4%.

Looking at the physical mobility of persons with difficulties by counties, the share of mobile persons, which was 61.3% at the level of the Republic of Croatia, varies from 56.1% in the County of Šibenik-Knin and 56.4% in the County of Krapina-Zagorje to 64.7% in the County of Osijek-Baranja, 63.8% in the County of Međimurje and 63.4% in the County of Split-Dalmatia.

The highest share of persons with difficulties who have permanently limited mobility aided by a cane, crutches or a walking cart was recorded in the County of Lika-Senj, 28.0%, and Šibenik-Knin, 27.9%, while the lowest share was recorded in the County of Međimurje, 20.2%, Split-Dalmatia, 20.3% and in the City of Zagreb, 20.5%. At the country level, the share of persons with difficulties was 22.4%.

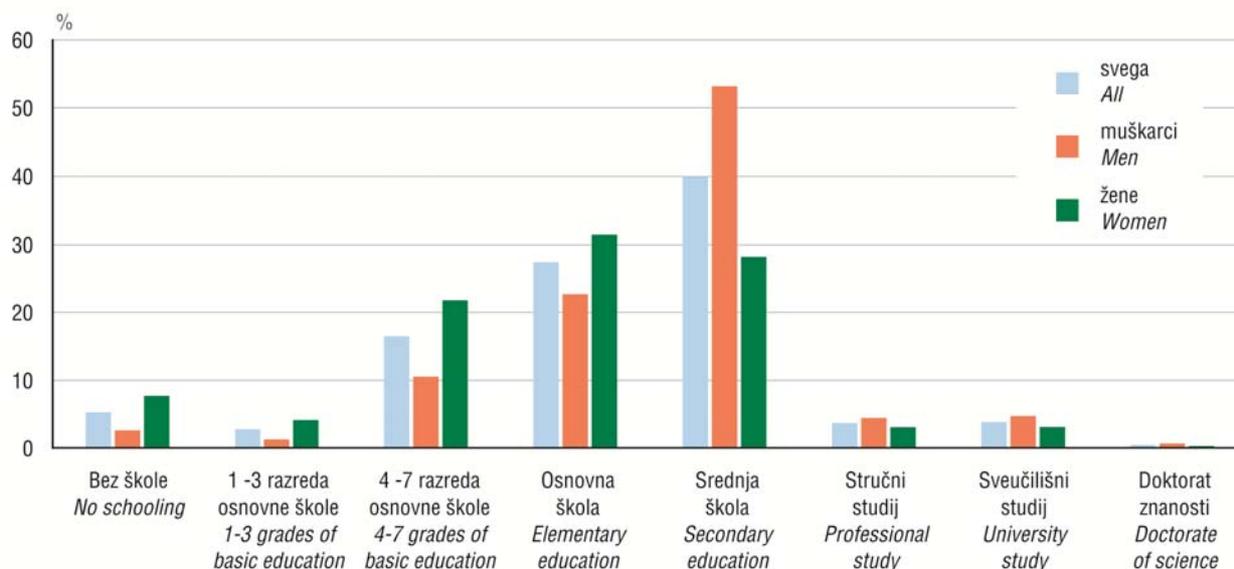

Istodobno, u Istarskoj je županiji najveći udio osoba s teškoćama koje su trajno ograničeno pokretne uz pomoć invalidskih kolica (1,9%), slijedi Grad Zagreb s 1,8% i Krapinsko-zagorska županija s 1,7%, a najniži udio je u Šibensko-kninskoj županiji i iznosi 1,0%, slijede Požeško-slavonska i Virovitičko-podravska županija s 1,1%. Na razini Republike Hrvatske udio te populacije iznosi 1,4%.

Udio trajno nepokretnih osoba u Republici Hrvatskoj u odnosu na ukupan broj osoba s teškoćama iznosi 2,2% ili 17 081 osoba. Primorsko-goranska županija jedina je županija s prosjekom identičnim u prosjeku Republike Hrvatske. Ispod državnog prosjeka udio je nepokretnih osoba u osam županija (Karlovačka: 1,8%, Krapinsko-zagorska: 1,9%, Zadarska: 2,0%, Sisačko-moslavačka: 2,0%, Brodsko-posavska: 2,0%, Šibensko-kninska: 2,1%, Ličko-senjska: 2,1% i Požeško-slavonska: 2,1%) i Gradu Zagrebu, gdje je taj udio 2,1%. U ostalih jedanaest županija udio trajno nepokretnih osoba iznad je državnog prosjeka (Bjelovarsko-bilogorska: 2,8%, Dubrovačko-neretvanska: 2,6%, Istarska: 2,5%, Koprivničko-križevačka: 2,5%, Međimurska: 2,4%, Zagrebačka: 2,4%, Vukovarsko-srijemska: 2,4%, Splitsko-dalmatinska: 2,4%, Virovitičko-podravska: 2,4%, Varaždinska: 2,3% i Osječko-baranjska: 2,3%).

At the same time, the highest share of persons with difficulties who have permanently limited mobility aided by a wheelchair was recorded in the county of Istria with 1.9%, followed by the City of Zagreb with 1.8% and County of Krapina-Zagorje with 1.7%, while the lowest share was recorded in the County of Šibenik-Knin, 1.0%, followed by County of Požega-Slavonia and Virovitica-Podravina with 1.1%. At the level of the Republic of Croatia, the share was 1.4%.

The share of permanently immobile persons in the Republic of Croatia in the total number of persons with difficulties was 2.2% or 17 081 persons. The County of Primorje-Gorski kotar was the only county which had a share equal to the country average. Compared to the average share at the country level, eight counties had a lower share of immobile persons (County of Karlovac: 1.8%, County of Krapina-Zagorje: 1.9%, County of Zadar: 2.0%, County of Sisačko-Moslavina: 2.0%, County of Slavonski Brod-Posavina: 2.0%, County of Šibenik-Knin: 2.1%, County of Lika-Senj: 2.1% and County of Požega-Slavonia: 2.1%), as well as the city of Zagreb with a share of 2.1%. In the remaining eleven counties the share of permanently immobile persons was above the average at the state level (County of Bjelovar-Bilogora: 2.8%, County of Dubrovnik-Neretva: 2.6%, County of Istria: 2.5%, County of Koprivnica-Križevci: 2.5%, County of Međimurje: 2.4%, County of Zagreb: 2.4%, County of Vukovar-Sirmium: 2.4%, County of Split-Dalmatia: 2.4%, County of Virovitica-Podravina: 2.4%, County of Varaždin: 2.3% and the County of Osijek-Baranja: 2.3%).

G-13. OSOBE S TEŠKOĆAMA STARE 15 I VIŠE GODINA PREMA RAZINI OBRAZOVANJA, POPIS 2011.
PERSONS WITH DIFFICULTIES AGED 15 AND OVER, BY EDUCATION, 2011 CENSUS

Promatrajući strukturu stanovništva s teškoćama starog 15 i više godina prema spolu i razini obrazovanja na razini Republike Hrvatske, najviše osoba s teškoćama obuhvaćaju osobe sa završenom srednjom školom, i to 296 594 ili 40,0%. Kod muškaraca taj udio iznosi 53,3%, a kod žena 28,1%. Završenu osnovnu školu ima 202 800 osoba ili 27,3% od ukupnog broja osoba s teškoćama koje su izjavile da imaju teškoće prilikom obavljanja svakodnevnih aktivnosti. Taj je broj veći kod ženske populacije i iznosi 123 395 osoba ili 22,7%, a kod muškaraca 123 395 osoba ili 31,5%. Znatniji broj osoba s teškoćama nalazi se i među osobama koje su završile 4 – 7 razreda osnovne škole, i to 122 256, što iznosi 16,5%; kod muškaraca taj broj iznosi 37 006 ili 10,6%, a kod žena 85 250 ili 21,8%.

Looking at the structure of the population aged 15 and over according to sex and level of education at the level of the Republic of Croatia, the most persons with difficulties finished high school, a total of 296 594 or 40.0% of them. For men, the share amounted to 53.3%, while for women it amounted to 28.1%. There were 202 800 persons who finished basic school, that is 27.3% of the total number of persons with difficulties that stated that they have difficulties in performing activities of daily living. The number was higher for women and amounted to 123 395 persons or 22.7% of the total number, while for men it amounted to 123 395 persons or 31.5%. A relevant share of persons with difficulties was also recorded in the population of persons who have finished 4 – 7 grades of basic school, amounting to 122 256 persons or 16.5%, while for men it amounted to 37 006 persons and for women to 85 250.
